

Doormat *ENTRA*

Washing and care instructions

Congratulations on your new entra absorbent doormat made of high-quality cotton!

It may happen that the doormat initially fluffs a little or loses individual fibers. This is because this doormat has been cut to size for you personally.

We would like to reassure you that this does not affect the quality and functionality of the mat. Any fibers can be easily removed by vacuuming.

Knock out or vacuum before laying out for the first time.

Carry out the first two washes by hand.

First wash the mat in the machine in a pillowcase to catch any residual fibers. residual fibers are collected.

You can wash the entra SAUGSTARK door mat on a gentle cycle at 30°C in the washing machine with mild detergent without fabric softener.
